Viewing – Vendor Header Details

Header Page of Vendor – Blocks & Deactivated

DEACTIVATED:
If Vendor status = "Deactivated"
Then Deactivated = **Deactivated**
Else, Deactivated = "Not Applicable"

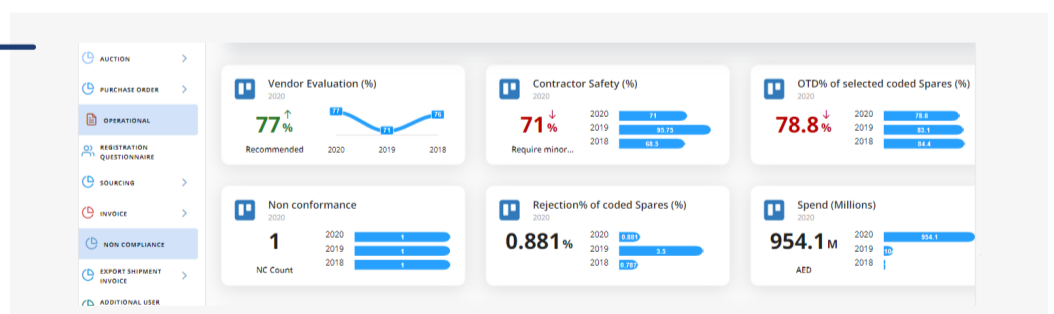

PURCHASING BLOCK:
If Vendor status = "Purchase Block"
Then Purchase Block = **Blocked**
Else, Purchase block = **Not Blocked**

FINANCE BLOCK:
If Vendor status = "Finance Block"
Then Finance Block = **Blocked**
Else, Finance block = **Not Blocked**

Note:
The above status are added based on SCH Vendor's status which are not available in Fiori, All other Header block data will match with Fiori

The visual representation shows three status boxes: 'Deactivated: Not Applicable', 'Purchasing Block: Not Blocked', and 'Finance Block: Not Blocked'. Each box has a blue border and a light blue background.

Viewing – yearly wise Performance of vendor by chart

CONTRACTOR SAFETY CHART FORMULA

SCH FORMULA:
For Contractor Safety chart alone, SCH Percentage calculation is slightly different from SAP Fiori

In Fiori, Score forward accumulation is used for the percentage calculation, whereas in SCH respective year score alone considered for calculation as explained in DEV demo session.

(Eg) Report is executed for Year 2018 to 2020

Fiori (Score for previous years calculated at run time based on the selected year)

- 2020 = Total score for 2020/No of entries for 2020
- 2019 = (Total Score of 2019+2020) / No of entries for 2019
- 2018 = (Total Score of 2018+2019+2020) / No of entries for 2018

SCH:

- 2020 = Total score for 2020/No of entries for 2020
- 2019 = Total score for 2019/No of entries for 2019
- 2018 = Total score for 2018/No of entries for 2018

Explained with screenshots in the following slides

CONTRACTOR SAFETY CHART FORMULA

SCH FORMULA

Report is executed for Year 2018 to 2020

FOR 2020:

TOTAL SCORE OF 2020 / TOTAL NUMBER OF ENTRIES IN 2020

FOR 2019:

TOTAL SCORE OF 2019 / TOTAL NUMBER OF ENTRIES IN 2019

FOR 2018:

TOTAL SCORE OF 2018 / TOTAL NUMBER OF ENTRIES IN 2018

CONTRACTOR SAFETY CHART FORMULA

SAP FIORI FORMULA

FOR 2020:

TOTAL SCORE OF 2020(CURRENT YEAR) / TOTAL NUMBER OF ENTRIES IN 2020 (CURRENT YEAR)

FOR 2019:

TOTAL SCORE OF 2019 + TOTAL SCORE OF 2020 / TOTAL NUMBER OF ENTRIES IN 2019

FOR 2018:

TOTAL SCORE OF 2018 + TOTAL SCORE OF 2019 + TOTAL SCORE OF 2020 / TOTAL NUMBER OF ENTRIES IN 2018

By using this filter and formula we get the 2020 contract safety percentage as like as SCH chart

Filter Data

From Year: 2018

To Year: 2020

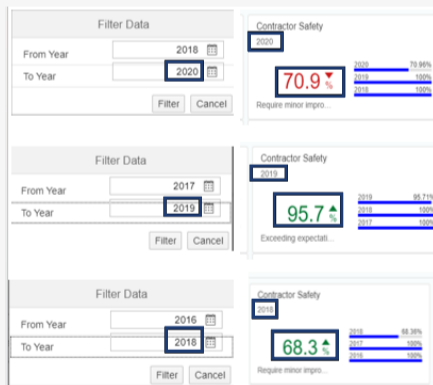

Filter Cancel

CONTRACTOR SAFETY CHART

FIORI Vs. SCH

Fiori Screenshots:

SCH Screenshots:

Conclusion: Highlighted Fiori values and SCH chart values are matching
